

RE928 Series: CDMA Interactive Gateway Module

Revive your aging accounts—Breathe new life into existing panels

Interactive services powered by **SECURENET**

Don't let existing accounts with aging systems disappear. Retain your accounts by upgrading them to full interactive services. Simply add the Resolution Interactive Gateway Module (IGM) to a Honeywell Vista™, DSC PowerSeries™, Interlogix Simon®, Interlogix Concord® or NX® panel. Unlike other cellular modules, the Resolution IGM provides smart phone-based security and Z-Wave home automation control of locks, lights and appliances. Keep your existing accounts healthy and active with new technology from Resolution.

The RE928 series of gateways incorporate a toggle switch allowing the technician to field configure the device based on the type of system it is installed on. This minimizes inventory requirements for the dealer and technician vehicles. The gateway also automatically determines the optimal cellular network automatically switching between Verizon and Sprint based on network coverage.

Key Features

Complete home automation services through Z-Wave connected devices

Full Smart Phone and Tablet security on Apple & Android platforms (iOS 5.1 & above, Android 3.0 & above, Windows 8.0 & above) and home automation for existing panels

Field configurable for panel compatibility. Full central station reporting.

- New services to existing customers without replacing the panel
- Reduced account attrition rates
- Control locks, lights and appliances
- Offers alarm reporting

Specification Table

Cellular	3G CDMA 1xRTT
Current Draw	120 mA Nominal, 2A peak
Temperature Range	0F to 120F

Specifications subject to change without notice.

Warranty: Resolution Products, Inc. will replace products that are defective in their first five (5) years.

Helix™ Compatible CDMA Expansion Card

Expand Helix's potential

Interactive services powered by **SECURENET**

For Helix systems installed in locations without broadband network access, you can install a CDMA communicator card. This device can be used as primary or back-up communications for Helix, delivering support for all Helix services including alarm reporting, home automation features, and interactive arming support. If Helix is connected over broadband, IP will be used for primary communications. Should the network be unavailable, Helix will automatically transfer services to the cellular link until the network services are restored.

CDMA option cards are available for slot 1.

Key Features

Delivers all Helix capabilities over Wi-Fi networks including applicable home automation features

Provides automatic back-up of alarm reporting and interactive services when IP connection isn't present

The expansion card is fully integrated into Helix, including the antenna, and leverages the power supply and back-up battery from the Helix system Plug and play ready. No extra programming or configuration required.
